

Cryptzone signs agent agreement with Jussystemer in Norway

Gothenburg, May 18, 2009 - Cryptzone today announces the signing of an agent agreement with Jussystemer AS for the entire Norwegian market.

Jussystemer has since 2005 worked with Cryptzone as a reseller and distributor in the Norwegian market. During this period, Jussystemer has introduced email encryption (Secured eMail) in Norway, focusing on the legal sector. Jussystemer has been very successful with their work.

In Norway today, there are a number of rules and regulations which have greatly increased the need for Cryptzone's products and solutions.

The companies have now come to an agreement that Jussystemer, as an agent will be responsible for all of Cryptzone's products in Norway. Through Jussystemer's purchase of the distribution rights for the Norwegian market, the cooperation between the two companies has been further strengthened.

"We are very happy to strengthen the cooperation with Jussystemer. With their great know-how and broad presence on the Norwegian market, they have gone to great lengths for a more secure way of dealing with sensitive information. We see a great potential in the steadily growing Norwegian market", says Peter Davin, CEO Cryptzone.

"Cryptzone's security solutions have worked very well on the Norwegian marketing and with the new agent agreement with Cryptzone, we will have the possibility to deliver a complete solution for protection against data leaks while maintaining a low TCO (Total Cost of Ownership), to our customers", says Steven Portch, CEO Jussystemer.
